# EMBRACE INHABIT EMBODY

Two full days of focused instruction to help you embrace a deeper understanding of how to find truthful, emotional depth with video game characters. Discover the flexibility to embody different characters and create new parameters within the same character so you can inhabit them in any situation. Master the skills that will help you consistently book video game roles and enrich your work for other voice acting mediums.

This workshop will use higher-level acting concepts & is aimed at experienced professional actors who already work or wish to work in games.

**DAY 1: Break into 2 groups. Every actor works on their choice of character across a range of scripts with Kirsty or Randall in the morning, then works with the other Director in the afternoon.**

**DAY 2: Divide into 2 different groups. Repeat the process with a 2nd choice of character.**

As a Voice & Performance Director and Casting Director, Kirsty's experience spans games from AAA to mobile, and genres from animation to audio drama. Her game directing & casting work includes Baldur's Gate 3, Call of Duty: Modern Warfare 2, Destruction AllStars, Synapse, Call of the Wild: theHunter series, LiveALive and upcoming projects for Sega and Nexon.

Co-founder of HamsterBall, Randall's extensive casting and directing video game credits include Chivalry 2, World of Tanks, Lord of the Rings Online, Hearthstone, Dungeons & Dragons Online, Vacation Simulator, World of Warcraft, Cobra Kai: The Karate Kid Saga Continues, and GI Joe: Operation Blackout.
